Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Detailed Action

This is the second Office Action corresponding to communication filed Dec 6, 2004. The application contains 22 claims. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1-5, 7, 9, 11-16, 18 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuhn et al. (Pat No 3,178,140).

The patent to Kuhn et al. shows a bracket comprising a propping member (14) having apertures, a connector member (40), coupling means (8, 50) disposed in the apertures and apertures (18) for securing the bracket to the base (supporting surface). The bracket shown by Kuhn et al. is capable of securing cables, like optic cables.

Claim Rejections - 35 USC § 103

Claims 6, 8, 10, 17, 20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohn et al.

The type of connector being used would depend on the type of cable to be secured within the bracket. The angle at which the connector and the propping members are disposed is considered to be an obvious matter of engineering choice having no patentable significance. To provide the apertures on the connector and not in the propping member is seen as an obvious reversal of parts if desired to attach the bracket in a different way.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that the art applied by the examiner is not being used with fiber optics cables. However, the fiber optics cables are not a positive element of the combination, and as long as the reference meets the functional language is a proper rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
